## OFFICE ACTION

### *Allowable Subject Matter*

Claims 1-8 are allowed. Following is the reason for allowance:

*Tailliet et al (US RE37,477)* discloses a partial region 12, made by local diffusion of N+ type impurities from the surface of the substrate, which is formed locally in region exclusive of the vicinity of two adjacent isolation regions [Fig. 3 and col. 5]. *Shimomura (US 6,693,330)* discloses first, second, and third implantation steps for implanting impurities throughout anode and cathode electrode formation regions [Figs. 6A-C and col. 6]. However, neither *Tailliet et al* nor *Shimomura* teaches or suggests, *inter alia*, a first-type impurity layer formed under a part of a second-type impurity layer of an electrostatic protective element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
